1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: Cancel non-elected claims 1-21, 45, 46, and 49-55.

1. The following is an examiner's statement of reasons for allowance: the claims are allowable because the prior art of record fails to disclose or adequately teach the recited combination of freezing salt water in a mold at the claimed temperatures. The cited patent to Burrue is considered to disclose the newly added limitation of a uniform application of coolant to the undersides and sides of the mold. However, Burrue does not disclose the freezing of salt water at the recited temperatures. While Stiller does teach the freezing of salt water at the recited temperatures, Applicant's remarks that Stiller does not use a mold for hard freezing the salt water into a shape conforming to that of the mold cavity, but only produces a slush type of ice using an auger are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
